

Darius Nazarov — Portfolio

Belgrade, Serbia · OGOxWOW Buro · Art & Science games and media installations

Darius Nazarov is an artist based in Belgrade, Serbia, trained in parametric architecture. His practice spans experimental Art & Science games and media installations, using digital systems to explore natural processes and the emotions they provoke. He represents OGOxWOW Buro, an art collective bringing together several artists, and presents Mold.log as an individual author.

Artist statement

I studied different types of mold in courses and encounter it frequently in everyday life. I am unsettled by the invisible world that quietly consumes what surrounds us. Digitisation and gamification are personal ways of working through that feeling: by breaking a natural process down and observing it closely, I can begin to make peace with it. My work builds small, controllable digital systems that let a viewer stay with discomfort long enough for it to become curiosity.

Mold.log (2026) — a full dish with five species after two minutes of growth.

Mold.log (2026)

Browser-based generative art game / interactive digital installation. HTML5, procedural growth simulation, generative sound. Duration: open-ended; one growth cycle $\approx$ 1 minute.

Visitors grow digital mold in a virtual Petri dish: they place spores, choose a strain (named after real fungi and bacteria), and watch the colonies branch, layer and collide, while each colony adds its own voice to a slowly building soundscape. The image is monochrome and pixelated, like a laboratory record; the visitor can pause, burn the dish clean and start again, and export any state as a PNG. No living material is involved.

Strain selection and early growth · a single colony · BURN clearing the dish · a full dish.

Selected exhibitions

Project	Year	Venue	Description
ExtraLives	2026	Boston Cyberarts Gallery, Boston (US)	Group show of experimental games and playable art; Mold.log presented as a playable station.
Video Game Artshow	2025–2026	Another Corner	Group exhibition of video-game art.
Signal	2024	Signal festival (RU)	Media installation in the festival art programme.
Archstoyanie	2024	Nikola-Lenivets (RU)	Site-specific media installation at the land-art festival.
Architecton	2024	with SA Lab	Media installation produced with SA Lab.
